Welcome to datawazi

{{CLIENT_NAME}} · {{PROJECT_TITLE}} · Proposal & SOW {{SOW_NUMBER}} · {{DATE}}

Thank you for choosing datawazi. This pack explains how we'll work together, who does what, and what we need from you to get started. It takes five minutes to read. Keep it for reference.

1. What we're doing together

The goal: {{ONE SENTENCE: the business problem and the decision it serves}}

What we'll deliver: {{3–5 headline deliverables, copied from the SOW}}

How we'll know it worked: {{success measures from intake Q3, e.g. "month-end report ready on day 1, not day 5"}}

Timeline: {{START_DATE}} to {{END_DATE}}, then {{2–4}} weeks of hypercare.

2. Who's who

Role	{{CLIENT_NAME}}	datawazi
Sponsor: makes decisions, signs off	{{NAME, ROLE}}	{{NAME}}
Day-to-day contact	{{NAME}}	{{NAME}}
IT and access	{{NAME}}	{{NAME}}
Data owners: know what the numbers mean	{{NAMES}}	
Testers: check it before go-live	{{NAMES}}	

3. How we'll work

- **Kickoff:** {{DATE, TIME}} MYT, {{LENGTH}}, {{LOCATION OR LINK}}. We agree success measures, access and the PDPA checklist.
- **Weekly demo:** every {{DAY}} at {{TIME}} MYT, 30 minutes. You see working progress every week, not just at the end.
- **Weekly update:** a one-page email every {{DAY}}: done, next, risks, decisions needed.
- **Quick questions:** {{CHANNEL}}. **Decisions and changes:** always confirmed in writing by email.

- **Response times:** we reply within one working day, usually sooner. Working hours: {{e.g. Monday–Friday, 9:00–18:00 MYT}}.

4. The path from here

Phase	What happens	Your part
Kickoff & access	Accounts, access, PDPA checklist, success measures	Approve access requests; join kickoff
Solution design	Architecture, data model, wireframes	Review and sign off the design
Build	Short sprints, weekly demos	Join demos; answer questions within 2 working days
Test & UAT	We reconcile numbers to your systems; your testers try it	Test, raise issues, sign off
Launch & handover	Go-live, documentation, training	Attend training; name the system owner
Hypercare	{{2–4}} weeks of close support	Report anything odd quickly

5. What we need from you

1. **Access** to the systems in the attached access checklist. Access is the most common cause of delay, so please start requests now.
2. A **sponsor** who can make decisions within a few days.
3. **People's time:** about {{N}} hours a week from your day-to-day contact, and short sessions with data owners and testers.
4. **Fast answers:** questions answered within two working days keep the timeline on track.

6. Your data is safe with us

- We build **in your environment** and accounts wherever possible. You own everything we build.
- **Least access:** read-only where possible, named accounts, multi-factor authentication on.
- **PDPA by design:** we complete the PDPA checklist with you at kickoff and only use personal data where the project needs it.
- **No client data in AI tools** without your written approval.

- If anything goes wrong, **we tell you within 24 hours**.
  Our full approach: the *Security & Data Protection Overview* (ask us for a copy).

7. If something needs to change

Ideas and new requests are welcome. If a change affects scope, timeline or cost, we write a short **change request** for you to approve **before** any work on it starts. No surprises on either side.

8. After go-live

You get documentation, training and {{2–4}} weeks of hypercare. After that, ongoing support is optional and agreed separately. We'll also check in after 60–90 days to see how it's working.
