[00] // the easiest place to start

Data health check. Two days. Clear answers._

A short, fixed-scope look at your data and reporting. You get plain findings and three quick wins you can act on, whoever does the work.

what's included

2 interviews

a leader who uses the numbers, and the person who prepares them

1–2 key reports or systems

reviewed for accuracy, effort and risk

5-page findings

what works, what is at risk, three quick wins, recommended next step

1-hour readout

with your team, online or on site

how it runs

day 0
Short call. You share the reports and read-only access (or samples).

day 1
Interviews and review.

day 2
Analysis and findings.

within a week
Readout and written findings.

what we need from you

- → A sponsor who owns the question
- → Two people for 60 minutes each
- → Read-only access or exported samples. No personal data needed

what you walk away with

- ✓ Three quick wins, in order
- ✓ Risks, including PDPA and key-person risk
- ✓ An honest next step, even if it is "nothing yet"

a good fit if you're asking

- → "Where do we start?"
- → "Can we trust these numbers?"
- → "Is our data ready for AI?"

the fee

One fixed fee, agreed in writing before we start. No surprises, no hourly meter.

If you want to go further, the next step could be a readiness audit, a focused build, or nothing yet. We'll say which.

Ask for the health check.

Thirty minutes to confirm it fits. The fee is confirmed in writing before any work starts.
