[01] // what we build · data platforms

One source of truth, sized to your budget._

We bring your systems into one well-modelled place, so every report, dashboard and AI feature starts from the same numbers.

sound familiar?

> “Finance and sales report different revenue.”

> “Every report starts with an export.”

> “Nobody knows which spreadsheet is final.”

what we do

+ Map your sources and the decisions they feed
+ Choose a platform that fits your budget and team
+ Build the warehouse and a clear data model
+ Set up refresh schedules, monitoring and access control
+ Reconcile key figures against your source systems

what you get

✓ A working data platform in your own accounts
✓ A documented data model and data dictionary
✓ Automated, monitored refreshes
✓ Role-based access with PDPA controls designed in
✓ Training and a handover pack

how it runs

01 discover	02 design	03 build	04 test & hand over
1–2 weeks	~1 week	weekly demos	UAT, training

A first phase usually takes 6–12 weeks. Weekly demos, docs and training are standard.

a good fit if

→ Two or more systems need to agree
→ Reports take days to prepare
→ You plan to add dashboards or AI later

works with

BigQuery, Snowflake, Microsoft Fabric, PostgreSQL, dbt, or what you already use.

Vendor-neutral: we recommend what fits, not what we resell. PDPA designed in from kickoff.

Start with a free 30-minute fit check.

Pricing is scoped after the fit check, in writing, before any work starts.
