[04] // what we build · workflow automation

Less copy-paste. Fewer chasers._

We automate the reports, approvals and hand-offs that eat your team's week, and keep a person in the loop where it matters.

sound familiar?

> "Approvals live in WhatsApp and email."

> "The same report is rebuilt every week."

> "Hand-offs fall through the cracks."

what we do

+ Map the current process and where the time goes
+ Remove steps before automating them
+ Automate reports, approvals, notifications and hand-offs
+ Keep a human sign-off where it matters
+ Log every run for audit

what you get

✓ Working automations in your own tools
✓ A before-and-after process map
✓ Time saved, measured after go-live
✓ Error handling and alerts
✓ A guide for the process owner

how it runs

01 map	02 simplify	03 automate	04 measure
today's process	cut steps first	weekly demos	time saved

Usually 1–4 weeks per workflow. Weekly demos, docs and training are standard.

a good fit if

→ A task repeats every week with the same steps
→ Errors come from re-typing
→ People wait days on approvals

works with

Power Automate, Google Apps Script, Make, n8n, Zapier, or your ERP's own workflow features.

Vendor-neutral: we recommend what fits, not what we resell. PDPA designed in from kickoff.

Start with a free 30-minute fit check.

Pricing is scoped after the fit check, in writing, before any work starts.
