Solution design: {{PROJECT_TITLE}}

Client: {{CLIENT_NAME}} · **Version:** {{VERSION}} · **Date:** {{DATE}} · **Status:** Draft / For sign-off / Approved

1. Summary

{{What we're building, for whom, and the outcome. 3–5 lines.}}

2. Requirements

ID	Requirement	Priority (Must / Should / Could)	Source
R1	{{e.g. Monthly sales by branch, refreshed daily by 7am}}	Must	Intake Q3, kickoff

Non-functional: users {{N}}, data freshness {{daily}}, availability {{business hours}}, data volume {{GB}}, security {{role-based}}, PDPA {{see checklist}}.

3. What users will see

{{Wireframes or screenshots per screen, dashboard page or workflow. For each one: who uses it, what decision it supports, and the key measures.}}

4. Architecture

{{SOURCES}} → {{INGESTION}} → {{STORAGE: raw → clean → modelled}} → {{SERVING: dashboards / apps / AI}}

Layer	Choice	Why (vs alternatives)
Ingestion	{{e.g. Azure Data Factory / Airbyte / Python}}	{{}}
Storage	{{e.g. Azure SQL / Fabric Lakehouse / BigQuery / Postgres}}	{{}}
Transformation	{{e.g. dbt / SQL views}}	{{}}

Layer	Choice	Why (vs alternatives)
Serving	{{e.g. Power BI / Looker Studio / custom app}}	{{}}
AI (if any)	{{model / provider, retrieval approach}}	{{}}
Orchestration & monitoring	{{}}	{{}}

5. Data model

{{Key entities, grain of each fact table, main dimensions. Diagram.}}

6. Data sources and integration

Source	Method	Frequency	Volume	Owner	Notes
{{}}	{{API / DB / file}}	{{}}	{{}}	{{}}	{{}}

7. Business rules and definitions

Term / measure	Definition	Agreed by
{{e.g. Net revenue}}	{{Gross sales − returns − discounts, excl. SST}}	{{Finance}}

8. Security, access and PDPA

Roles and what each can see · personal data handling (from the PDPA checklist) · environments (dev / prod).

9. Operations

Monitoring and alerts · what happens when a load fails · backup and recovery · cost estimate for running ({{monthly cloud / licence cost}}) · who supports it after hypercare.

10. Risks and decisions

ID	Decision / risk	Option chosen	Reason	Date

11. Sign-off

Role	Name	Signature	Date
