UAT plan and sign-off: {{PROJECT_TITLE}}

UAT window: {{START}} – {{END}} · **Testers:** {{NAMES}} · **Log:** UAT_Reconciliation_Log.xlsx

1. What's being tested

Area	In UAT?
{{Dashboard pages / reports}}	☐
{{Data pipelines: completeness and freshness}}	☐
{{Automations / workflows}}	☐
{{Custom tool screens}}	☐
{{AI assistant answers}}	☐
Access and security by role	☐

2. How to test

1. Open the test case in the log (tab **Test cases**).
2. Follow the steps and record **Pass / Fail / Blocked** with a comment or screenshot.
3. For numbers, fill in the **Reconciliation** tab: report value, source value, difference, explanation.
4. Anything that fails goes on the **Defects** tab with a severity.

3. Reconciliation rules

- Period(s) to reconcile: {{e.g. last 3 closed months}}
- Tolerance: {{e.g. exact for counts; ± RM1 for totals, from rounding}}
- Source of truth for each measure: {{e.g. revenue = ERP GL; headcount = HR system}}

4. AI features (if any)

- Test set: {{N}} real questions from users, with expected answers and sources
- Pass rule: {{e.g. ≥ 90% correct and cited; 0 answers leaking restricted data}}
- Out-of-scope questions must be declined politely

5. Defect severity

Severity	Meaning	Must fix before go-live?
Critical	Wrong numbers, data leak, system unusable	Yes
High	Key feature broken, with a workaround	Yes, unless the sponsor accepts it
Medium	Minor feature issue	Agreed case by case
Low	Cosmetic	No, fixed in hypercare

6. Exit criteria

- ☐ All test cases run
- ☐ No open Critical or High defects
- ☐ All in-scope numbers reconciled within tolerance
- ☐ Remaining defects listed with an agreed fix date

7. Sign-off

UAT is complete and the deliverables listed above meet the acceptance criteria in SOW {{SOW_NUMBER}}, subject to the open items below.

Open items accepted for hypercare: {{list or "none"}}

Role	Name	Signature	Date
Sponsor			
Business owner / lead tester			
Datawazi lead
